📍 Prayagraj, Uttar Pradesh, India ✉ gupta.sachinkumar87@gmail.com 📞 +917398787880 🌐 in/sachingupta-ds 🐙 github.com/Sachin-Kumar-Gupta

SUMMARY

Data Analyst with 2 years of experience delivering end-to-end analytics solutions across freelance, corporate, and internship settings. Skilled in SQL, Python, and dashboarding tools, with hands-on expertise in predictive modeling, A/B testing, segmentation, and KPI optimization. Adept at collaborating with cross-functional teams and translating complex data into real-time, actionable insights. Passionate about gaming and player behavior, with growing capabilities in ML deployment and game data experimentation. Thrive in fast-paced, remote environments with a bias toward self-guided exploration and continuous learning.

PROJECT

Automated Data Cleaning App

github.com/Sachin-Kumar-Gupta/Data-Cleaning-Assistant

September 2025 - September 2025

- Built an interactive Streamlit app enabling users to clean and analyze datasets with over 20+ configurable options, including missing value imputation, outlier handling, and distribution visualization.
- Optimized data workflows using Python and Pandas, reducing manual cleaning time by 60% across test datasets of 10000+ rows.
- Designed a modular UI with column-specific controls and conflict-free keys, allowing users to preview changes and apply cleaning steps in a step-by-step, transparent workflow used by peers for portfolio demos and client onboarding.

Cyclistic Bike Share Analysis project

github.com/Sachin-Kumar-Gupta/Cyclistic-Bike-Share-Analysis

August 2025 - August 2025

- Analyzed 6M+ ride records to compare usage patterns between casual and annual users.
- Cleaned and transformed 1.5GB dataset; engineered features for trip distance and duration.
- Built 10+ interactive plots to uncover behavioral trends, supporting a membership conversion strategy.

Automatidata Project

github.com/Sachin-Kumar-Gupta/Automatidata-Project

August 2025 - August 2025

- Cleaned and validated NYC taxi-trip data from 2017 using Python and Pandas.
 - Conducted EDA and feature engineering to identify tipping behavior.
 - Built ML model (Logistic Regression) to predict high-tipping customers with 73% accuracy and 70% precision.
-

EXPERIENCE

Kepler Voice

Data Analyst

Prayagraj, U.P., India
November 2023 - March 2024

- Presented insights to leadership, influencing operational decisions and improving team visibility.
- Developed Python-based data validation protocols, achieving 99.8% accuracy across weekly KPI reports.
- Engineered automated data pipelines using Apache Airflow and SQL to process 750K+ records weekly, reducing ETL execution time by 35% and supporting real-time KPI dashboard updates for three business units.
- Directed A/B tests using Python, SQL, and Tableau over a 6-month period across 5 workflows, uncovering actionable insights that increased campaign conversion rates by 11% and guided quarterly product enhancements.
- Managed independent work streams on a 4-month data quality initiative, utilizing Python and SQL to deliver clean datasets for 12 cross-departmental projects, which improved monthly reporting efficiency by 22% and ensured compliance with audit KPIs.

Fiverr

Data Analyst

Remote
January 2022 - October 2023

- Delivered 15+ Tableau dashboards for clients in e-commerce, healthcare, and education sectors.
- Automated reporting workflows, reducing manual effort by 30% and improving client turnaround time.
- Conducted weekly ad hoc analyses using SQL and Python, uncovering revenue opportunities for 5 client accounts.
- Applied Data Science techniques using Python and SQL over a 12-month period to build predictive models, increasing client average ROI by 18% across 5 verticals and supporting quarterly decision-making for stakeholders.

Innomatics Research Labs

Data Science Intern

Remote
October 2021 - January 2022

- Deployed ML models on AWS via Streamlit, improving processing speed by 20%.
- Built a COVID-19 chatbot that handled 100+ queries, enhancing user engagement.
- Boosted model accuracy by 15–20% through feature engineering and iterative tuning.

Simple And Real Analytics

Machine Learning Intern

Remote
April 2021 - September 2021

- Built ML models with 80% accuracy for sales forecasting and customer segmentation.
- Applied RFM and survival analysis on 50K+ records, improving targeting precision by 25%.
- Published 3+ ML blogs, reaching 1,000+ readers and showcasing technical storytelling skills.

EDUCATION

B.Tech in Mechanical Engineering

Sachdeva Institute Of Technology

Mathura, U.P.
2017

CERTIFICATIONS

Google Data Analytics Professional Certificate

Coursera • 2023

- Completed 8-course program covering data cleaning, analysis, and visualization using SQL, spreadsheets, and data storytelling.
- Applied course capstone to real-world-scale project using SQL & Python.

SKILLS

Core Analytics & Modeling

- A/B Testing, Hypothesis Testing, Regression, Clustering (K-Means, DBSCAN), Classification (Logistic, RF), Time Series (SARIMAX).
- Churn Modeling, Retention Analysis, Segmentation, CLV, Game Balancing Simulation

Tools & Engineering

- Python (Pandas, NumPy, Scikit-learn), SQL (PostgreSQL, BigQuery), Tableau, Power BI, Excel, Streamlit.
- ML Deployment: MLflow, Git CLI.
- GenAI: OpenAI, Hugging Face (exploring).

Communication & Collaboration

- Stakeholder Reporting, Data Storytelling, Client Communication.
 - Presentation Design using AI, Remote Team Collaboration.
-
